**Product Image:**

**Sales Description:**  
*NOTE: this copy can be used in brochures, catalogues or online*

**All the tools you need to care for Bluelab® probes**

Probe cleaning is one of the most important parts of owning or operating any Bluelab® meter, monitor or controller.

The probe surface is where the instrument takes the reading of the solution or soil/media. If the probe face is dirty or contaminated, then the reading will be inaccurate.

Accurate readings simplify crop management and provide improved growth.

Use Bluelab® Solutions to re-stock your probe care kit.

- Kit Contents:**
- 2x 20ml / 0.67fl oz single-use Bluelab® 2.77 EC Conductivity Standard Solution Sachets
  - 1 plastic cup
  - Bluelab® Conductivity Probe Cleaner
  - Bluelab® Chamois (probe cleaning instrument)
